

Discharge after 5 years if no change and not on any IOP lowering medication

Patient Information

Explanation of Condition/Risk Factor

Importance of Annual Review

Select Optometrist

From register of accredited optometrists

Advise GP

of discharge to OHTMS and advise GP of chosen Optom. GP needs to be aware that if any referral received for high IOP's from other optoms then patient does not need referral. GP should be aware of need for annual review and encourage patient to attend.

Send Info to Optometrist

Include Target IOP, month of first review and recommended review interval.

Angle Assessment

as referral refinement

Threshold Fields
